

## Quality Control

*In today's highly competitive, global economy business leaders must continually adapt business practices to keep their teams performing at ever increasing levels*

*We'll work closely with your quality team to assess your business for strengths and weaknesses and map out a well-defined strategy to exploit opportunities and manage or mitigate threats.*

Put the MBC Team to work for you - let our skilled network of quality experts help define and implement a continuous improvement solution for your business.

Midwest Business Consulting specializes in Operations Management, Continuous Improvement and Business Process Re-engineering. We maintain a ready network of highly skilled and seasoned professionals across a variety of verticals giving our management team a wide-berth of expertise and opportunity for cross-industry benchmarking. These teams, which are brought together on a project-by-project basis, are highly experienced at designing new / auditing existing operations for process gaps, procedural errors, waste & inefficiencies and ultimately implementing efficient and cost-effective resolutions - the result is improved customer satisfaction and bottom line performance. We work closely with your quality team to understand root-causes and develop practical solutions to optimize operations for productivity, efficiency and response times.

### **Six Sigma:**

At the core of any business' profitability is the capacity to meet those customer requirements that are identified as Critical to Quality (CTQ). Let MBC help lead your QA/QC teams in developing effective problem-solving tools to identify hindrances, optimize business processes and implement practical, cost effective quality solutions.

Let the certified Six Sigma experts at Midwest Business Consulting help champion your team and keep your business on target!
